★ Key Features of AI Selfie Software

AI Portrait Beauty & Skin -

Enhance portraits with AI skin smoothing, blemish removal, and natural facial feature adjustments.

Dynamic Backgrounds & Edits -

Change and blur backgrounds, add bokeh effects, or place yourself in new virtual scenes.

Stylized Art Filters -

Transform photos with unique styles: oil painting, comic book, black & white, and digital art effects.

Real-time Video Filters & Effects - Apply filters, animations, and AR overlays dynamically during live selfie recordings.

AI Group Shot Enhancement -

Automatically optimize lighting, focus, and composition for group selfies, even with multiple faces.

Diverse Pose & Gesture Control -

AI recognizes and suggests better poses, or enables gesture-based hands-free photo taking.

Smart Photo Editing & Comparisons -

Quickly compare original and edited shots with AI suggestions for best results.

Global Style & Accent Adjustments -

AI tailors enhancements to match a wide range of global skin tones and cultural aesthetic preferences.
