Promote offers and information with eye-catching digital standees.

CMS SOFTWARE ADMIN CONSOLE

Our CMS Software admin Console can show all screen in 1 Dashboard.

ALL SCREENS IN 1 DASHBOARD

View and manage all your display screens, devices, content, and status in a single powerful dashboard.

REAL-TIME MONITORING

Get real-time updates on all your screens across locations including online / offline status, content playing, and more.

CENTRALIZED CONTROL

Manage content, schedules, playlists, and settings for all your screens from one centralized platform.

SMART ANALYTICS

Make data-driven decisions with detailed analytics and performance reports.

APPLICATIONS FOR

ANDROID
Application

SAMSUNG
TIZEN OS
Application

LG webOS
Application

CMS

(Content Management System)

1. CREATE & MANAGE CONTENT

Easily create, upload, and organize content in multiple formats like images, videos, HTML and more. Manage your media library, update content anytime, and ensure it's ready for publishing across all screens.

Content Library

- Images
- Videos
- HTML/Apps

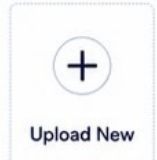

Offer Banner.jpg

Promo Video.mp4

Summer Sale.html

Upload New

2. SCHEDULE & PLAYLIST

Plan and schedule content to play at the right time on the right screen. Create playlists, set durations, and automate content playback to match your business needs and audience.

Playlist

- | | | |
|---|------------------|-------|
| 1 | Welcome Banner | 00:10 |
| 2 | New Offers Video | 00:20 |
| 3 | Product Image | 00:15 |
| 4 | Thank You Slide | 00:10 |

Schedule

Date Range

May 10 – May 20, 2025

Time

09:00 AM

–

10:00 PM

Repeat

Daily

3. MANAGE DEVICE

Remotely add, monitor, and manage all your devices from a single dashboard. Check device status, screen health, content playback, and resolve issues in real-time to ensure smooth operations.

Devices

Device Name	Location	Status	Last Seen
Kiosk - 01	Lobby - Floor 1	Online	Just now
Signage - 02	Store - Entrance	Online	2 mins ago
Video Wall - 01	Control Room	Online	1 min ago
Standee - 03	Mall - Ground Floor	Offline	15 mins ago

4. ANALYTICS & REPORTS

Track performance and engagement with detailed analytics and reports. Monitor content views, playback success, device uptime, and audience interaction to measure impact and make data-driven decisions.

Content Views

Device Uptime

Top Performing Content

	Summer Sale Video	12,560
	New Arrivals Banner	8,230
	Product Launch Video	6,950

Platform Overview

Everything works together to deliver content to every screen.

01

How the platform fits together

The CMS is the central hub. You create content, organize it, and assign it to screens. Players installed on screens pull the content, play it, and report status back to the platform in real time.

02

Screens & fleet management

View and manage your entire network of screens from one place. Organize by groups, locations or tags and track status, uptime, and last seen information at a glance.

03

Pairing a new screen

Generate a pairing code or QR code from the console and enter/scan it on the player app. The screen is instantly linked to your account and appears in your dashboard.

04

Channels & sub-channels

Organize content into channels and sub-channels to reflect your structure. Easily delegate access and keep content targeted and relevant for each audience or location.

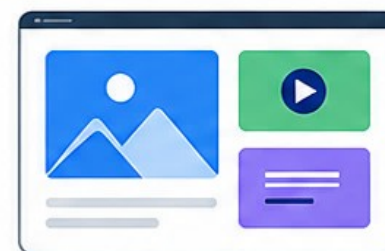

05

Playlists & scheduling

Build playlists with your content and set when and where they should play. Create schedules for different days, times, or date ranges with repeat and priority options.

06

On-screen layouts

Design engaging layouts using zones for videos, images, text, tickers, widgets and more. Save templates and apply them across playlists and screens.

07

Media library

Upload, organize and manage all your media files in one place. Support for images, videos, audio, documents, HTML and live streams with metadata and tagging.

08

The TV player

Our smart player app is secure, reliable and built for 24/7 performance. It plays content smoothly and supports layouts, scheduling, offline playback and more.

09

Remote control, monitoring & alerts

Monitor screen health and playback in real time. Remote actions like restart, volume, and screenshot. Get alerts for offline screens, errors and other important events.

10

App updates (OTA)

Update player apps and configurations over the air. Roll out to a single screen or the entire network with version control and rollback for safety.

11

Multi-tenant, users & billing

Support multiple brands or clients under one platform with complete data isolation. Manage users, roles, permissions and flexible billing plans.

12

Security, platforms & deployment

Enterprise-grade security with secure communication and role-based access. Works across Android, Samsung Tizen, LG WebOS and more. Deploy on cloud or on-premise—your choice.
