

QUEUE MANAGEMENT SOFTWARE

A smart Queue Management Software helps organizations manage customer waiting lines efficiently, reduce waiting time, and improve the overall visitor experience.

KEY FEATURES

Digital Token System

Generate and manage customer tokens easily.

Real-Time Queue Status

Track waiting and serving customers in real time.

Display & Voice Calling

Show on screen and announce the next token.

Multiple Counters

Manage multiple service counters from one centralized system.

Appointment Management

Handle scheduled appointments and walk-ins efficiently.

Live Dashboard

Monitor queue performance and service activity live.

Analytics & Reports

Analyze waiting time, service time, and customer flow.

Multi-Location Support

Manage queues across multiple branches easily.

Mobile & Kiosk Integration

Allow customers to join queues through kiosks or mobile devices.

Customer Notifications

Send alerts when their turn is approaching.
